

I-
Memorandum of Understanding

This Memorandum of Understanding is made on this 20th day of June 2021 by & between

Sanskriti School of Engineering and School of Business, a premier Institution and having its location at Puttaparthi, Andhra Pradesh hereinafter referred to as "INSTITUTION" which expression shall unless repugnant to the context or meaning thereof, include its successors in interest and permitted assigns and also its affiliates of the FIRST PART;

and

TSILICON & its affiliates, having its registered office at 3-503, Purva Fountain Square, Marathalli, Bangalore- 560037, (hereinafter referred to as "COMPANY" which expression shall unless repugnant to the context or meaning thereof, include its successors in interest and permitted assigns) of the SECOND PART;

The INSTITUTION and the COMPANY are collectively referred to as "Parties" and individually as "Party".

The INSTITUTION is engaged in offering Undergraduate Postgraduate (Engineering by Research) degrees in Science, Engineering, and Management.

The COMPANY is a well funded Solutions and Services company providing cutting edge solutions in VLSI, Embedded, IoT solutions and AI/ML

domain.

part of its vision to enhance the entrepreneurial appetite, innovation to bridge the gap between Industry & academia, the INSTITUTION has invited the COMPANY to identify potential areas of collaboration and work towards a long

standing & mutually beneficial partnership. The company intends to reciprocate to collaboration in all these areas & increase its research & solution design capability.

The above goals will be accomplished by undertaking the following activities:

1. INSTITUTION would provide their interested students, researchers, IT infrastructure and lab facilities to converge in setting up specific training and associated workshops in the areas of VLSI, IoT, Embedded Solutions and AI/ML.
2. COMPANY feels privileged & honored to associate with the sonic objectives of the institution and would collaborate to accomplish these objectives by employing processes, industrial knowhow & resources (including trainees). The COMPANY will help in creating a center of Excellence in VLSI and AI/ML domain. The scope of work would be as follows:
 - a. COMPANY will help in VLSI curriculum development, from architecture to GDS. For the next ten years, it will be one of the main areas our focus will be and that will be part of a project. The INSTITUTION will identify professors who will be trained by the COMPANY both remotely and on-site. After the training, the COMPANY will help with the development of the chip through the college. The INSTITUTION will have to sign up with fabrication aggregators, like IMEC and MOSIS to get the PDK in house. Once the PDKs are procured, COMPANY will outline the architecture of the product and help to close the design from timing and DRC perspective.
 - b. COMPANY will assist in developing IoT products, from PCB design to firmware development and productization.
 - c. COMPANY will provide expertise in developing open source EDA tools. The COMPANY will partner with the CS department and share some of the industry standard algorithms which would need optimization. The CS along with the EE department will develop the code and test out on industry standard designs.
 - d. COMPANY will assist in AI/ML and data science courses and will help in tying up with companies to bring industry projects.
 - e. COMPANY will assist in creating a Robotics program which will include the Mechanical, CSE and EE departments.
3. COMPANY will also work with the School of Business and Engineering to set up an incubation unit for Entrepreneurship programs.
4. Any innovation disclosures & products derived out of such collaboration will be co-owned by the parties the terms of which will be defined in the MoU.

This MOU is at-will and may be modified by mutual consent of authorized officials from the INSTITUTION and COMPANY in written form. This MOU is valid for 2 years from the effective date and can be suitably extended upon mutual consent.
